

Ask your doctor about VASCEPA®.

You're working hard to lower your very high triglycerides. Yet they may still be too high. Here are some questions you may want to discuss with your doctor to see if VASCEPA is right for you.

- 1. What are very high triglyceride levels?
- 2. Why is it important to treat very high triglyceride levels and what are mine?
- 3. How is treating very high triglycerides different than treating high cholesterol?
- 4. What is VASCEPA and can it help me?
- 5. Why is it important that VASCEPA is FDA-approved and only available by prescription?
- 6. How often would I need to take VASCEPA?
- 7. What are the potential side effects of VASCEPA?
- 8. How soon can I check on my triglyceride levels if treated?

Other notes: _____

It's clear. There is only one VASCEPA.

Only pure EPA Omega-3.* FDA-approved.

VASCEPA, along with diet, is clinically proven to lower very high triglycerides in adults by

 33%

without raising bad cholesterol (LDL-C).†

Why is it important to take the 4-gram daily dose of VASCEPA?

To ensure you get the full benefit of VASCEPA, it's important to take the FDA-approved 4-gram dose each day as your doctor prescribes. In clinical testing, patients taking the 4-gram daily dose of VASCEPA, along with a healthy diet, lowered very high triglycerides by 33% without raising bad cholesterol.† Taking less than this recommended daily dose did not achieve these results.‡

For the standard size, take two 1-gram capsules twice a day with food.

If you prefer the smaller size, take four of the 0.5-gram capsules twice a day with food.

*Vascepa 1-gram capsules contain 1 gram of icosapent ethyl, a form of the unique Omega-3 fatty acid known as EPA, and inactive ingredients.

† In MARINE trial, on average, along with diet changes, adults with very high triglycerides experienced a 33% reduction without raising LDL-C vs. placebo. Individual results may vary.

INDICATION

WHAT IS VASCEPA?

VASCEPA is a prescription medicine used along with a low-fat and low-cholesterol diet to lower high levels of triglycerides (fats) in adults.

- It is not known if VASCEPA changes your risk of having inflammation of your pancreas (pancreatitis).
- It is not known if VASCEPA prevents you from having a heart attack or stroke.
- It is not known if VASCEPA is safe and effective in children.

IMPORTANT SAFETY INFORMATION

WHO SHOULD NOT TAKE VASCEPA?

- Do not take VASCEPA if you are allergic to icosapent ethyl or any of the ingredients in VASCEPA.

WHAT ARE THE POSSIBLE SIDE EFFECTS OF VASCEPA?

- It is not known if people who are allergic to fish or shellfish are also allergic to VASCEPA.
- If you have liver problems and are taking VASCEPA, your doctor should do blood tests during treatment.
- The most common side effect of VASCEPA is joint pain. Talk to your doctor for medical advice about side effects.

As with all drugs, you may experience a serious side effect when taking VASCEPA.

You may report side effects by calling 1-855-VASCEPA or the FDA at 1-800-FDA-1088.

Tell your doctor if you take medicines that affect your blood clotting (anticoagulants or blood thinners).

Take VASCEPA capsules whole. Do not break, crush, dissolve, or chew VASCEPA capsules before swallowing.

For more information on VASCEPA, please see the full Patient Information on Vascepa.com or call **1-855-VASCEPA (1-855-827-2372)**.
